## PROFILE

I'm a passionate and hardworking individual with a strong interest in technology and creativity two core elements of effective UI/UX design. I thrive on learning new skills, embracing challenges, and delivering thoughtful, user-focused solutions. With a background in software and a focus on UI design, I aim to create intuitive, engaging experiences that blend aesthetics with functionality, while continuously growing as a designer.

## PROJECTS

### Mobile App for a Coffee Shop

**Role** – UI/UX Designer

Designed a mobile app to a coffee shop. From the app customers can check the prices of the products the shop have and order from the app. Users can select whether they dining or getting a take away. Users can maintain their profiles by adding favorite coffees and changing their personal details.

### GO LANKA

Developed and designed a real-time public transport information( Arduino technology) and a seat booking System (Degree Final Project)

**Role** – UI/UX Designer and Full Stack Developer

From this system users(Passengers) can track the real time location of the bus, book their seat, Book busses for trips after creating a profile.

On the other side bus owners can create their account using the sign up page made to owners. They can register their root buses and trip busses separately. They can see their usage reports of busses on their dashboard.

When a passenger books a seat he gets a online ticket via email and they can track the location from it. When passengers need to book a trip bus they can contact the owner directly from the system sending an email.
